

Memo

To: Bethpage Residents
From: Edward Hannon, Project Director
Date: October 5, 2023
Subject: Upcoming Groundwater Monitoring Well Replacement Activities on Route 107

Northrop Grumman is providing this progress report to you on our activities in support of the RW-21 groundwater treatment system and our existing on-site groundwater treatment system (OU2 ONCT).

Beginning Tuesday, October 10, 2023, Northrop Grumman's contractors will mobilize a fleet vehicle, drill rig and tender vehicle to the work zone pictured left to begin the installation of a replacement groundwater monitoring well (light teal dot) on Hicksville Road, just northeast of Fiddler Lane.

Work hours are 8 a.m. to 5 p.m. We anticipate completing this installation by the end of the workday (weather dependent).

The work zone will include all appropriate safety and traffic controls including work zone signs and a flagger. We ask all local drivers to maintain a safe driving speed while moving through the work zone.

If you have questions about this upcoming project work, please contact Jamie Gillcrist at (443) 465-1015 or jamie.gillcrist@ngc.com. Dianne Baumert-Moyik returns to the office on October 16.

Our project information can be found by visiting www.northropgrumman.com/bethpage. Thank you.
